JUSTICE IN MEDIATION

March 12, 2004 9am – 2pm

The panelists aim to provide an engaging analysis of the justice dimensions of mediation. Critics of mediation claim that mediation sacrifices a just result- a result in keeping with accepted societal norms- for mere efficiency and expedience. The panel will examine this critique and explore perspectives on justice in mediation including, reparative justice, retribution, distributive justice, relationship and community building, and procedural justice. Panelists will address whether the mediator's introduction of legal (or other) norms into mediation compromises the parties' self-determination of which justice norms should apply.
